Dear Mr. Kristiansen.

Thank you very much for your letter coming from your heart. I have been touched, because your letter emanates an infinite love and attention for the Nature. I am not a "naturalist" for education, but in my family (my wife teaches natural sciences and we live in the country) we pay great attention to the Nature and like to identify botanic and zoologic species at sight (minerals only in the lab!). In particular, we have several books on fungi and like to identify them, also because we like to heat them (even those species which, in spite of being edible, are usually not considered for gastronomy).

I hope to have the opportunity to meet you personally.

Best wishes

Giovanni Ferraris

Giovanni FERRARIS, Professor of Crystallography Univ. Torino, Dpt. Scienze Mineralogiche e Petrologiche Via Valperga Caluso 35, I-10125 Torino, Italy Tel +39 011 670 7121, Fax +39 011 670 7128 ferraris@dsmp.unito.it http://www.dsmp.unito.it/ferraris/ferraris.html

Things are interesting only in so far as they relate themselves to other things (J.B.S. Haldane).
